

A Selden mast and furler is illustrated. Maximum hoist on other furlers is measured in the same way. Attach a tape measure **and** small diameter downhaul line to the upper shackle before hoisting. Alternately, you can measure the luff of your old sail with the luff pulled tight.

Please measure the max hoist as shown. Remember, this is for a special order sail; your order cannot be cancelled, returned, exchanged, or modified once your order is accepted, so please measure carefully. Complete your order by agreeing to these terms and signing below.

Maximum hoist: _____

x _____
signature

_____ printed name
