& Description***

PARTS LISTS BOOKLET

Current Prices: Produce a new price list at any time. Click on the *New Parts List* link found at: www.catalinadirect.com > Handbooks > C-22 Owner's Handbook. We make every effort to insure the data on our web store that is used to compile this on demand price list for you is accurate. However, with over 7000 items in our store and early boats with as much as 45 years of "experience", there will be errors.

In particular, many parts for older boats are sold only rarely. It is possible that the last inventory we received was the last of a large batch produced

years ago when Catalina was building thousands of Catalina 22's every season. If we run out and have to establish an entirely new supply chain to bring you that part, there could be a significant price increase. Prices are subject to change without prior notice.

We will never ship you a part that has increased in price without calling for your approval first. If you order a part online, and upon processing your order we discover that we don't currently have the part available to ship within a few days, we will call you to let you know.

PARTS LISTS CONVENTIONS

A word about the year of your boat: Over the years, various parts on the Catalina 22 have changed. Running lights are an example. Lights used on the first boat built in 1969 are not the same lights used today. When Catalina changed a part from one year to the next, we indicate the years a part was used with abbreviations as illustrated by the examples below.

A caveat: Years are only approximate. Catalina will make a change anytime during a model year when improvement is possible. They don't wait for a change in model year to make the improvement.

In addition: Sometimes the factory is forced to make a change due to outside forces. For example: When one of their vendors discontinued an item and Catalina is forced to substitute a different item.

1st, 2nd and 3rd generation boats: We refer to the original Catalina 22 as the **1st Generation**.

You may hear people refer to the 1986 and later boats as the "New" model. In fact in late 1985 Catalina introduced a boat which included some extensive and significant improvements. But this change did not coincide with the change in the model year. 1986 model year boats, built in late 1985, did not have these changes. The "New" boats started with hull number 13143 in October of '85. These "New" model boats will be designated by 86-> considering the vast majority of the

Abbreviations	Description
76<->84	Used on boats built during the years from and including 1976 through and including 1984
<-87	Used on boats built any year up to and including 1987
88->	Used on boats built any year from and including 1988 (except Sport model)
?82<->87	No record exists of the beginning date. 1982 is our best estimate
86->, SP	Used on boats built any year from and including 1986 plus the Sport model
	If no years are specified, the part will work on any year model

1986 model year boats were this design. We refer to this "New" model as the **2nd Generation** boat since by 1995 it was no longer new!

In 1995 another "New" boat was introduced, designated the MkII. To avoid confusion, we refer to this boat as the **3rd Generation** boat.

There are many examples, like the one above, that with the aid of your hull number, we can more accurately determine the correct part. This is why we ask for your hull number when you call.

There are instances where changes were made at the factory and the exact hull number is not known. In these instances, our personal knowledge of the parts may be the only assistance you have in making a correct decision. If this is the case the range of years will be indicated ?82<->87, or 82<->87? or perhaps 87?->.

ORDERING & SHIPPING

Call our experienced sailors at 800/959-7245

We will help confirm you have chosen the correct part for your boat and sailing style.

Sales Tax: will be added to shipments within California only at the current applicable tax rate.

Payment: Payment by charge card expedites your order. Orders pre paid by check will be delayed for check processing.

Ground Shipping Rates	Price
Order value to \$9.95	\$4.95
Order value to \$15.00	\$7.50
Order value to \$50.00	\$8.95
Order value to \$150.00	\$10.95
Order value above \$150.00	\$12.95

Air and oversize shipments: Air freight or oversize shipments will be calculated based on the carrier's rate plus \$3.00 per order.

International orders: We will reply, typically via e-mail and typically with two estimates, one for shipping via UPS and another for shipping via US Post. The purchaser is responsible for any taxes, duty and brokerage fees required upon arrival.

Partial Shipments: For domestic shipments, in-stock items will be shipped immediately. Back ordered items will be shipped as they become available. No additional shipping will be charged for multiple ground shipments due to back orders.

All international orders will be held until they can be shipped complete unless otherwise instructed. Additional shipping will accrue to multiple shipments to international addresses.

Crating Charges: Large or fragile items require special packaging in order for them to arrive in one piece. A boom or outboard motor bracket, for example, would always arrive damaged without special packaging.

Return Policy: Returns are welcome on stock items within 30 days of shipment. Special order

and custom made items are not returnable.

For product returns call for an RMA number. Note the number on the outside of your return package. **Returns sent without an RMA number will be refused.**

Items returned for reasons other than a defect must be in new condition including original packaging and suitable for resale.

Non returnable Items

Custom Made Parts: You provide the information we need to build these product for you. Once you order it we are going to build it just for you, just as you asked based on your dimensions, color choice or perhaps your sample. We never want to see it again, and no one else wants it either. So be careful and order it correctly the first time because it can't be canceled, returned, or magically changed into something different!

Special Orders and Drop Ship: Special Order items are items that we do not stock and are only ordered when you call and ask for them. Drop Ships are those item that arrive directly from the manufacturer in order to save you some shipping costs. Examples: Furling gear, winches, non-stock hatch lenses, keels, and rudders.

When you order these items it sets off a chain of events like Willie Wonka in the chocolate factory. Once you turn the valve, the chocolate is coming down the pipe. If you then decide you want caramel, the chocolate is still going to come out of the pipe. We can't put the Chocolate back in the pipe, so someone is going to have to eat it, and it's not going to be us! Your order can't be canceled, returned, or magically changed into caramel, so please order carefully the first time!

Refunds or Credits: Refunds for credit card purchase that are returnable will be issued to your credit card account for the purchase price of the item. Checks for refund of a purchase paid by check will be issued for the purchase price of the item no sooner than 10 working days after our receipt of your original payment check. At your option we will credit your account at The Foredeck or ship replacement product.

PARTS LIST BY NUMBER

Part #	Description	Year	Price
BK01	Book Annapolis Book Of Seamanship		\$55.00
BK02	Book Sailing Fundamentals		\$25.00
BK03	Book Basic Keelboat		\$26.69
